-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I, claims 1-31, in the reply filed on 6/21/06 is acknowledged. The traversal is on the ground(s) that the same search would be required for both Groups. This is not found persuasive because the same search is not required.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-9, 17, 20, 21 and 24-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Husted (6,983,684).
2. Husted discloses molding a mixture of isocyanate resin, release agent (wax) and wood fibers by prepressing and pressing. The binder is 1.5-20 wt% and release agent is 0.5-2.4 wt%. The press temperature is 175-240°C. See column 3, lines 3-19 and column 7, line 19 to column 8, line 10.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1732

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Husted in view of EP 0 909 295 and Sun (5,096,945).

6. Husted is disclosed above. EP 0 909 295 discloses molding isocyanate, wood particles and wax. The release agent can be internal or external [005]. The molding pressure is 2-6 MPa [0026]. The moisture content of the fibers can be 12% (EXAMPLE 11). It would have been obvious to one of ordinary skill in the art to use an external release agent instead of the internal release agent of Husted because EP 0 909 295 indicates that they are interchangeable. The specific pressing temperatures, pressures and times of the claims would have been obvious to one of ordinary skill in the art because Sun indicates (column 4, lines 33-61) that these are variables that are determinable by one in the art.
